

G VINITH SAI REDDY

Bengaluru, India | +91-83101 79438 | gvinith2005@gmail.com | [linkedin.com/in/vinith-g](https://www.linkedin.com/in/vinith-g) | github.com/Vinithsaireddy

EDUCATION

Bangalore Institute of Technology

B.E. in Computer Science and Data Science | CGPA: 8.2 / 10 | Bengaluru, India

2023 – 2027 (Expected)

Vidyaniketan PU Science College

Pre-University Education | 82.6% | Karnataka, India

2021 – 2023

TECHNICAL SKILLS

Languages	Java, Python, JavaScript (ES6+), C++, SQL, Solidity
Frontend	React.js, React Native, Next.js, Tailwind CSS
Backend	Node.js, Express.js, Spring Boot, REST API Design
AI & Machine Learning	TensorFlow, YOLOv8, DenseNet121, EfficientNet-B0, LangChain, RAG Architecture, Scikit-learn, OpenCV, Pandas
Databases	MongoDB, Firebase, SQL
Cloud & DevOps	AWS (EC2, S3), Docker, Git, GitHub, Postman, Power BI

EXPERIENCE

App Developer & Full Stack Intern

Mar 2025 – Apr 2025

Vinidra Softtech · Remote

- Built and deployed the **Keliri cross-platform mobile application** using **React Native**, integrated with a **Next.js RESTful backend** hosted on **AWS EC2** — shipped to production for a Bengaluru-based advertising company.
- Developed the **Keliri admin web portal** using **React (Vite)** and **Tailwind CSS** with a **Spring Boot backend**, implementing role-based access control for Super Admin and Admin tiers managing ads, publishers, and accounts.
- Configured **Amazon S3 buckets** for scalable media asset storage and managed backend deployments on **AWS EC2**, ensuring production-grade reliability and uptime.

PROJECTS

Leaf Disease Detection using Deep Learning

Nov 2025

Tech: TensorFlow, YOLOv8, DenseNet121, EfficientNet-B0, OpenCV, Python

- Engineered a **two-stage deep learning pipeline** — **YOLOv8** for infected leaf detection followed by a **DenseNet121 + EfficientNet-B0 ensemble** for multi-class disease classification — achieving **98% classification accuracy** on the PlantVillage dataset.
- Applied **transfer learning**, **ROI-based feature extraction**, and **data augmentation** to improve model generalization under varying lighting and background conditions.
- Deployed the trained model as a **live Hugging Face Space** (Tomato Leaf Classifier), making the solution publicly accessible for real-world agricultural use.

Keliri — Online Advertisement Mobile App

Mar 2026

Tech: React Native, Next.js, Node.js, AWS EC2, Amazon S3, REST APIs

- Developed a **cross-platform mobile application** enabling geo-targeted advertisement creation and publication within a defined radius, built for a live Bengaluru-based advertising platform.
- Architected a **Next.js RESTful API backend** deployed on **AWS EC2** with **Amazon S3** integration for scalable media storage, supporting end-to-end ad creation and real-time publication workflows.

Keliri — Admin Web Portal

Apr 2026

Tech: React (Vite), Spring Boot, Next.js, Tailwind CSS, AWS EC2

- Designed and delivered a **full-featured admin portal** with **role-based access control** (Super Admin and Admin tiers) for managing advertisements, publishers, and admin accounts on a live production platform.
- Built a **responsive, production-grade UI** with Tailwind CSS and integrated **secure authentication and authorization workflows** via Spring Boot and Next.js backends hosted on AWS EC2.

CORE COMPETENCIES

React.js • React Native • Next.js • Node.js • Express.js • Spring Boot • TypeScript • JavaScript (ES6+) • Tailwind CSS • REST API • Full Stack Development • MongoDB • Firebase • SQL • TensorFlow • Deep Learning • Machine Learning • Computer Vision • YOLOv8 • LangChain • RAG Architecture • OpenCV • AWS EC2 • Amazon S3 • Docker • Git • GitHub • Agile • Problem Solving • DSA
